SmartStudy Assistant: Capstone Project Proposal

ICT 3107/3108 Capstone Project

October 20, 2026

1 Introduction

The **SmartStudy Assistant** is an Object-Oriented Java application designed to help students organize tasks, track learning materials, manage quizzes, and monitor study progress using a structured dashboard.

2 System Architecture & Class Diagram

The application prototype consists of five core domain classes: `User`, `Task`, `StudyMaterial`, `Quiz`, and `StudyDashboard`.

3 Methodology & Development Plan

The project follows an Agile development strategy with iterative design, implementation, and testing phases:

- **Milestone 1:** Requirement analysis and Object-Oriented Modeling.
- **Milestone 2:** Java prototype code implementation.
- **Milestone 3:** Integration, testing, and final repository submission.

4 GitHub Repository

The implementation and system documentation are maintained at the project repository:
